

## Certification in 8-to-10 weeks

Telecommunications is one of the fastest-growing industries with thousands of jobs that go unfilled in southwestern Pennsylvania. Starting wages begin at \$20/hour with the likelihood of increases and job promotions.

In 8-to-10 weeks through the Gismondi Job Training Program by Catholic Charities, we will teach and certify qualified learners the skills to be successful in the following areas:

- **Telecommunications**
- **Fiber Optics and Broadband**
- **Green Technology**

The Gismondi Job Training Program by Catholic Charities will train you for jobs, including the following areas:

- **Telecommunications**
  - Telecommunications Technician
  - Low Voltage Electrician's Assistant
  - Security & Fire Alarm Installer
- **Fiber Optics and Broadband**
  - Fiber Optics Cable Installer
  - Fiber Optics Splicing
  - Fiber Optics Production Technician
  - Fiber Optics Network Operator
- **Green Technology**
  - Recycling Technician
  - Green Building Technician
  - Conservation Technician
  - Energy Auditor

## Building Your Future Together

**The Gismondi Job Training Program  
by Catholic Charities**

212 Ninth Street, Pittsburgh, PA 15222  
412-456-6999

## Telecommunications

Telecommunications involves building communication networks, installing the systems that 20th-Century communications run on, and maintaining or updating that infrastructure.

### **Jobs include:**

- Telecommunications Technician
- Low Voltage Electrician's Assistant
- Security & Fire Alarm Installer

## Fiber Optics and Broadband

Fiber Optics and Broadband is a field that builds and maintains the cabling that provides internet and telephone systems.

### **Jobs include:**

- Fiber Optics Cable Installer
- Fiber Optics Splicing
- Fiber Optics Production Technician
- Fiber Optics Network Operator

## Green Technology

Green Technology is a field that focuses on maintaining the different ways we limit the impact on the environment. This field focuses on reducing our carbon footprint and developing and implementing sustainable plans for the future.

### **Jobs include:**

- Recycling Technician
- Green Building Technician
- Conservation Technician
- Energy Auditor

## **Our Part**

### **We will:**

- Teach you the basics of Telecommunications Technologies and how they connect us with the world
- Provide expert, hand-on experiences to prepare you for your job
- Make certain you'll be work-ready after the training
- Offer the opportunity to obtain 5 in-demand certifications to highlight your new real-world skills
- Help you find employment and provide additional job skills like resume building or interview practice – even after you graduate

## **Your Part**

We'll bring our best and expect our students to do the same. What does that mean?

- Be on time and ready to learn at the program's official start time.
- Dress for the workplace.
  - Wear clean clothes without inappropriate logos or content, including references to alcohol, drugs or sexual content.
  - Attire should not inhibit your ability to move, bend, or lift objects.
- Attend every class.
- Keep up with learning the skills in the training.
